In The SPECIFICATION

Please replace paragraph [0068] as follows:

[0068] The network clients, servers or other systems for providing peer-to-peer networking using Bloom-filter query routing may be any type of computing device capable of processing and communicating digital information. An example of a representative computing system capable of carrying out operations in accordance with embodiments of the present invention is illustrated in FIG. [[7]] 6. Hardware, firmware, software or a combination thereof may be used to perform the various querying and data transfer operations described herein. The computing structure 700 of FIG. [[7]] 6 is an example computing structure that can be used in connection with such a peer-to-peer system.
